

# 950 SERIES

## 2-STROKE GASOLINE ENGINE GEN-SETS

950 is an Portable Gasoline generator with 650-900W of maximum output.

These series are mainly designed to serve as power generating unit of small capacity, which supply electricity for lighting purpose in ships, for house-hold electric devices used in towns or villages.

It's easy to carry and use. It possesses the features of low fuel consumption, low in noise, low pollution and stable voltage and frequency and so on.

### TECHNICAL DATA

| MODEL     |                     | HQ950                      | HQ1050 | HQ1150 | HQ1250 |
|-----------|---------------------|----------------------------|--------|--------|--------|
| Generator | Max.Power (W)       | 650                        | 700    | 800    | 900    |
|           | Rated Power (W)     | 500                        | 550    | 650    | 750    |
|           | Voltage (V)         | 220                        |        |        |        |
|           | Frequency (HZ)      | 50                         |        |        |        |
